

**Hull Public Access Bleed & Trauma Kits**

**IN THE CASE OF A SERIOUS BLEED CALL 999 IMMEDIATELY AND TAKE GUIDANCE FROM THE OPERATOR. DO NOT LEAVE THE CASUALTY ALONE TO RECOVER ONE OF THESE KITS.**

**What Is It?** – Bleed and Trauma Kits is a single point of emergency equipment which can provide lifesaving initial care to someone who suffers a serious bleed through whatever means. In the case of a serious bleed these few minutes can be vital, and this kit helps untrained members of the public provide support until medical personnel arrive.

**What Is In The Kit?** – Inside the kit is basic equipment such as a tourniquet, bandages and dressings. None of this kit requires training and there is a guidance sheet in the kits themselves. PPE is also included such as gloves.

**Where can I find one?** – We've worked hard to place these kits in accessible areas within your community. Thanks to the support of our manufacturing partner Heartsafe an up to date map complete with exact locations of the kits can be found at: [Bleed Kit Map | HeartSafe® AED Locator](#) or accessed using the QR code here.

**The current list of registered BLEED KITS SITES**

**Please note these are regularly updated so checking the website above is recommended**
